Species or issues	All
Documents distributed (e.g. <i>DIVERSIFOOD brochure, booklet..</i>)	Power Point presentation.
Stakeholder involved (e.g. <i>other experts, policymakers, scientists, farmers, extension services or stakeholders</i>)	Consumers, researchers and students.

Outcomes

Objectives

- To contribute to the training of the students on the promotion of the production and consumption of local varieties and to communicate the work done in DIVERSIFOOD project.

Positive and negative points

Strengths

- To interact and train students of the university.

Weaknesses

- Students have not deep knowledge in seed production and local varieties.

Relevance

The activity helped to show the relevance of the collective management of the cultivated biodiversity in the professional future of the students of agronomy.

Tricks for other partners

Is essential to open the university to the lectures of organisations of the civil society.

Perspectives

Include these aspects in the Green Week of the Andalusian universities.
